DETAILED ACTION

Claim Objections

Claim 30 is objected to because of the following informalities: The claim depends from cancelled claim 16. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 5-8, 10, 20-23, 25 and 31-48 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 7,100,496. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are merely an obvious variation of the patented claims.

Allowable Subject Matter

Claims 5-15 and 20-48 are allowable over the prior art of record.

Claims 9, 1—15, 24 and 26-30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 13 August 2010 have been fully considered but they are not persuasive.

Applicant argues that a prima facie case for rejecting the claims based on obviousness-type double patenting has not be established.

It should be noted that a nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claims because the examined application claim is either anticipated by, or would have been obvious over, the reference claim.

Applicant states that claim 32 includes a piercing element having "a substantially cylindrical engagement portion to pierce said cartridge in correspondence to said breaking line and to enter the cartridge so that an exterior side surface of the cylindrical engagement portion engages said outlet opening completely". Applicant additionally states that the at least one delivery port "is positioned during beverage dispensing

between the wall of the piercing element and an edge of the outlet opening and extends around the perimeter of the cylindrical engagement portion.

These arrangements are anticipated or obvious over the patented claims 1, 2 and 3 subject matter.

Additionally the claimed ration between the diameter of the cylindrical engagement portion of the piercing member and the diameter of the outlet opening is obvious over the patented claim subject matter.

The subject matter of claim 32 is not patentably distinct from that of the patented claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
